AMENDED VERSION

IN THE CLAIMS:

- (Twice Amended) An isolated antigenic peptide corresponding to SEQ ID
 NO: 4 that induces an anti-IgE immune response that does not cause anaphylaxis when administered to an animal.
- (Twice Amended) An isolated antigenic fusion protein corresponding to SEQ ID NO: 4 and a heterologous carrier protein that induces an anti-IgE immune response that does not cause anaphylaxis when administered to an animal.
- 7. (Twice Amended) A pharmaceutical composition for inducing an anti-IgE immune response that does not cause anaphylaxis comprising one or more antigenic peptides of a CH3 domain of an IgE molecule wherein at least one antigenic peptide corresponding to SEQ ID NO: 4.

Please cancel claim 8.

9. (Twice Amended) A pharmaceutical composition for inducing an anti-IgE immune response that does not cause anaphylaxis comprising one or more antigenic fusion proteins of a CH3 domain of an IgE molecule; and a heterologous carrier protein, wherein at least one antigenic fusion protein corresponds to SEQ ID NO: 4.

Please cancel claim 10.

(Twice Amended) An isolated antigenic peptide corresponding to SEQ ID
 4 that induces an anti-IgE immune response that does not cause anaphylaxis when administered to an animal.

40. (Twice Amended) An isolated antigenic fusion protein corresponding to SEQ ID NO: 4 and a heterologous carrier protein that induces an anti-IgE immune response that does not cause anaphylaxis when administered to an animal.
